[Company] Recruiting
Role – e.g., Software Engineer Intern

Subject: [Role] Application – [Your Name]

Dear [Company] Recruiting Team,

I am a [X]th-year Computer Science student at [University] applying for the [Role]. [Company]'s work on [specific product/tech: infrastructure at scale / AI tools / developer platforms] is the reason I chose engineering – I want to learn how teams build systems that serve millions of users.

My strongest project, [Project Name], is a [description] built with [stack] that [ships metric: serves X users / handles X req/s / cut latency by X%]. It is deployed with Docker and a GitHub Actions CI/CD pipeline, and I wrote [X] tests to keep coverage at [X]%. I have also solved [N] LeetCode problems, sharpening my skills in [topics]. My code and write-ups are on GitHub: github.com/yourname.

I am specifically interested in [team/product] because [honest specific reason]. [Something you learned from their engineering blog / a product you use.] I work well on teams – [one example: hackathon / club / open-source PR] – and I am excited to learn from the engineers at [Company].

I would love the opportunity to contribute and grow during the [Summer] [Year] internship. Thank you for considering my application.

Sincerely,
[Your Name]
