Solapur, Maharashtra, India

Professional Summary

Web Developer with hands-on experience building responsive, full-stack web applications using React.js, Node.js, and FastAPI. Skilled in frontend/backend development, REST API design, Git/GitHub workflows, and integrating AI APIs into production applications. Strong foundation in HTML, CSS, JavaScript, and modern web architecture with a track record of shipping production-grade, scalable platforms.

Education

N. K. Orchid College of Engineering & Technology	Solapur, Maharashtra
B.Tech in Artificial Intelligence and Data Science – CGPA: 8.5/10	Aug. 2023 – Present (Expected 2027)

Technical Skills

Frontend: HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, Responsive Design, Monaco Editor, Real-time UI with WebSockets
Backend: Node.js, Express.js, FastAPI, REST API Design, PostgreSQL, MongoDB, Redis, Microservices, Authentication (JWT, RBAC)
AI Integration: HuggingFace Transformers, OpenAI Whisper, AI/Chatbot API Integration, NLP-based Features
Tools & Workflow: Git, GitHub, GitHub Actions CI/CD, Docker, Celery, Debugging & Testing
Other: Python, Java, C++, SQL, DSA (366+ LeetCode problems)

Experience

Fullstack Web Development Intern	Unified Mentor Pvt. Ltd
Frontend, Backend & AI-Integrated Web Systems	Jul. 2025 – Jan. 2026
– Built an AI-powered code review web platform integrating GitHub PR workflows, AI APIs, and a responsive frontend dashboard; reduced analysis latency by 45% through asynchronous backend processing and caching.	
– Developed a real-time collaborative web IDE with sub-100ms sync using WebSockets and Socket.IO; built a responsive frontend with Monaco Editor and live multiplayer cursors.	
– Built and deployed REST APIs and automation workflows for a distributed ML inference platform, improving throughput by 60% via request batching, caching, and monitoring dashboards.	
– Used Git/GitHub for version control and collaborative development across all projects; debugged, tested, and optimized performance throughout the development lifecycle.	

Projects

SentinelX: AI-Powered Cybersecurity Platform FastAPI, React, HuggingFace, PostgreSQL, Docker	May 2026
– Built a full-stack threat detection web application with backend APIs for real-time analysis of phishing, scams, and social engineering attacks across email, SMS, and voice.	
– Implemented JWT authentication, RBAC, and automated async task workflows (Celery + Redis) for production deployment, with HuggingFace DistilBERT and OpenAI Whisper AI integration.	
Tracelify: Log Aggregation & Crash Analytics Platform FastAPI, React, PostgreSQL, Docker, Microservices	Apr. 2026
– Built a full-stack log aggregation and crash analytics platform with a React dashboard for real-time visualization and a FastAPI backend with clean, modular REST API design.	
– Implemented role-based multi-tenant access control and reduced code duplication by 40% using reusable design patterns; developed cross-platform SDKs in 6 languages.	
RAG Knowledge Assistant FastAPI, React, Chroma, Docker	Jun. 2026
– Built a full-stack Q&A web app over 500+ documents with hybrid retrieval (vector + BM25), source-cited answers, and a Dockerized FastAPI backend + React frontend.	
– Added an eval harness scoring 92% retrieval hit-rate on a 50-question set and a provider abstraction that falls back to a free offline LLM.	

Leadership & Achievements

Hackathon Champion: 1st Place Hack to Future 3.0 (600+ teams, INR 50,000) for SentinelX; 1st Runner-Up Orchathon 2K26 (800+ teams) for Tracelify.
Open Source: 50+ PRs merged across Google (OSS-Fuzz), Microsoft (VibeVoice), Apache (DataFusion), and Hedera Hashgraph (Hiero SDK).
Class Representative (2023-2027): Elected for AI & DS cohort (120+ students); organized technical seminars and coding workshops.
Certifications: Kaggle AI Agents Intensive Course; JPMorgan Chase & Electronic Arts SWE Virtual Experience; NPTEL Programming in Java (Elite+Gold) and Joy of Computing using Python.
